Art Unit: 1651

The amendment received 6/28/04 has been entered and claims 1-9, 11-15 are currently pending in this application.

In view of the amendments to the claims and arguments presented, the rejection under 35 USC 112, first paragraph, is hereby withdrawn.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-9, 11-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The addition to the claims of "wherein the steps of coupling and detecting are performed sequentially without removing the substrate or product that is not coupled to the resin" is not found in the specification as originally presented. The specification refers to a single step assay in general but does not suggest or fairly teach the newly added phrase specifically.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9, 11-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

In claim 1 line 8, "the label" lacks antecedent basis. In claim 1 line 8, "the amount of substrate" lacks antecedent basis. In claim 2 line 4 "thereby effecting the conversion" is unclear and lacks antecedent basis. "Converting" may be intended.

The rejection of record under 35 USC 102(b) as anticipated by Cerretani is maintained.

Applicant's arguments filed 6/28/04 have been fully considered but they are not persuasive.

Applicants argue that the invention is an assay which can stop the reaction and separate the product from the substrate for detection and quantification in a single step. The coupling and detecting are performed sequentially. Cerretani does not describe the assay is performed without removing the charged product coupled to the resin.

It is the examiner's position that the present open ended claims do not properly state the argued points. Cerretani would separate the product from the substrate in a single step and the claims read on this function. The newly added limitation to the claims regarding "without removing the substrate or product that is not coupled to the resin" is new matter.

The rejection of record under 35 USC 103(a) as obvious over the combination of Cerretani in view of each of Sandmann and Stulovici is maintained.

Applicant's arguments filed 6/28/04 have been fully considered but they are not persuasive.

See above.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
